EDITOR'S NOTE

This month's issue is a special one as it marks the return of in person fairs and trade shows after a two year long hiatus. As the industry resumes its original fervor, the excitement was palpable in 2022's Watches and Wonders fair. Be it new launches, innovative designs, informative panel discussions or enlightening keynote speeches, this year's Watches and Wonders saw it all! Watchmaking maisons launched a slew of new models and allowed watch lovers to experience the magic of watchmaking. We bring you all the latest offerings, trends and information on the watch industry's most awaited show!

Drawing inspiration from celestial bodies, Fossil India launches its latest collection that pays a tribute to the sun and the moon. The sun, moon and stars all feature on this delectable collection that is sure to wow every type of watch enthusiast. We give you a roundup of these creations that make one feel like a cosmic event is taking place on your wrist every day! In a similar vein, affordable watches brand Swatch collaborates with industry pioneer Omega to bring to you a space inspired collection that's out of this world. Japanese brand Seiko encapsulates the spirit of adventure with its latest collection that incorporates the cool blue tones of ice in a watch.

Closer home, Indian brands have made excellent advances in the Smart Watches category as they test out their latest offerings on the discerning Indian consumer. The starry night with its dark shades and aura of mystery inspires a new collection by Casio. Purples, ink blues, steel grays and of course jet black make an appearance on watches that are sure to steal the night! The arrival of spring sees a burst of colours and shades that makes watches available in every colour of the rainbow. These collections will appeal to both young and old as there is something for everyone.

Watch brands are slowly blurring the lines between product categories and making bold forays into lifestyle verticals. With a never seen before collaboration of watchmaking giants and other lifestyle related brands, the world of watches is in for an exciting ride!

We hope you enjoy this issue!

FOSSIL

Cosmic Confluence

Ever since its inception in 2008, Fossil India has been a mainstay in the affordable watches category in India. With its youthful designs and superior craftsmanship Fossil has managed to garner a loyal following from the youngsters of the country. With a widespread presence in India, Fossil has managed to consistently maintain its growth and push the boundaries of innovation. The focus on automatics brings to light the brand's effort towards sustainability, as the watches do not need a battery, along with showcasing the capabilities in design.

“Today we have 22 dedicated Fossil retail stores in the best locations across the country. We are also present in 750+ points of sales in leading Department stores across the country like Shoppers Stop, Lifestyle and Collective as well as specialty watch stores like Helios, Kamal Watches, Zimsons, Just watches and a host of leading watch retailers. We are also present in key consumer Electronic stores like Reliance Digital and Croma,” says Johnson Verghese, Managing Director, Fossil India.

A SKY FULL OF STARS

The simple act of looking up into the sky has a layered meaning of being dreamy, romantic, head in the clouds idealistic. But with a sight as beautiful as the night's sky how can one resist? Channeling the energy of this celestial body, Fossil introduces a collection that is powered by the movements of the moon and appealing to the consumer's astronomical side, the brand launches its latest Shining Stars Collection.

"The Shining Stars collection has been created to provide people with a luxury celestial experience displaying style and Fossil's craftsmanship. As the leading fashion watch player in India we enhance our product portfolio to create watches that our customers love," explains Mr Johnson.

The collection includes the Neutra Moonphase and the Jacqueline Sun/Moon watches. Each watch features a novel movement that tracks celestial features with a harmonious blend of sophisticated details and quality finishings.

THE NEUTRA MOONPHASE FOR HIM

Balance and proportion form the foundation of the Neutra Moonphase collection, one which exudes both sophistication as well as high quality. Powered by innovative engineering, the watch's Moonphase movement keeps track of the lunar cycle and features a minimal design that offers enhanced functionality. The sun / moon movement indicates the time of day or night. As the day goes on, a sun or moon gradually appears.

Moonphase complications typically involve the placement of two identical moons on a disc under the dial. A 59-tooth driving wheel controls the movement of the disc using a mechanical finger to advance the disc once per day. On the completion of a single 29.5 day lunar cycle, the second moon appears in the aperture resulting in a total of 59 teeth. While the driving wheel remains constant, the details of the underlying moon disc will differ depending on the design of the dial and aperture.

In terms of the aesthetics, the design is inspired by the clean-lined look of mid-century modern design, making it a straightforward, uncluttered, and functional dress piece. It is suitable for both work and play, and is available in five variants in both leather strap as well as stainless steel bracelet. The sunray dial is encased in stainless steel, and features day and night dials with genuine Japanese moonphase movement.

THE JACQUELINE DAY/NIGHT – FOR HER

The classic Jacqueline receives a makeover and is now called the Jacqueline Day/Night. It is a whimsical 3 hand watch where the dial exhibits a starry sky graphic and ornate mother of pearl clouds on the surface of the dial. As the day goes on, a moon or sun gradually appears on the dial, allowing you to follow their movement throughout the day. Additional clear glitz crystals on the top ring and polished 5-link bracelet really makes the Jacqueline Day/Night sparkle, much like stars in the night sky. Also available in five variants, the Jacqueline Day/Night is a quintessential piece for any time of the year.

In order to change or correct the time display on the day/night watch, Fossil provides an easy method. Pull the crown out to position III. This will stop the watch. Turn the hands forward by turning the crown, until the current moonphase display appears. Push the crown back into position II and set the current date using the quick change. Push the crown back to position I. The time will now be displayed correctly.

“Our consumers have been loving both our Shining stars and Automatics collections. Despite Shining stars being a recent launch, we are seeing a lot of interest amongst our audiences towards the collections, and it is doing well so far. We are going above and beyond to ensure our customers across the country have access to the best fashion accessories. We have been on a growth path for Fossil from the time we set up our operations in India in 2008 barring the drop due to Covid in 2020. We do see a strong future for Fossil in India given the brand’s distinct appeal to the young adults in the country,” concludes Mr Johnson.

In Conversation with Johnson Verghese, Managing Director, Fossil India

Talk us through Fossil now focusing on moonphase/day and night watches and automatics. What is the reason behind the shift in focus?

Fossil has been on a growth trajectory since our launch in 2008. We constantly push ourselves to innovate and come up with superior quality products for our consumers. The focus on automatics brings to light our effort towards sustainability, as the watches do not need a battery, along with showcasing the capabilities in design. The Shining stars collection is to provide people with a luxury celestial experience displaying style and Fossil's craftsmanship. As the leading fashion watch player in India we enhance our product portfolio to create watches that our customers love.

How has the consumer responded?

Our consumers have been loving both our Shining stars and Automatics collections. Both the categories have products across different designs, colors and materials. Despite Shining stars being a recent launch, we are seeing a lot of interest amongst our audiences towards the collections, and it is doing well so far.

Growth of Fossil watches in India?

Today we have 22 dedicated Fossil retail stores in the best locations across the country. We are also present in 750+ points of sales in leading Department stores across the country like Shoppers Stop, Lifestyle and Collective as well as specialty watch stores like Helios, Kamal Watches, Zimsons, Just watches and a host of leading watch retailers. We are also present in key consumer Electronic stores like Reliance Digital and Croma. We are going above and beyond to ensure our customers across the country have access to the best fashion accessories. We have been on a growth path for Fossil from the time we set up our operations in India in 2008 barring the drop due to Covid in 2020. We do see a strong future for Fossil in India given the brand's distinct appeal to the young adults in the country.

OMEGA

Call Of The Sea

Omega has always had a special connection with the sea. Be it the first ever timepiece to dive into the deepest depths of the ocean or its headlining Seamaster collection, Omega is the undisputed ruler of the seas. In order to continue its legacy, the brand has now made the technology that made the dive possible available to the public by transforming it into an impressive 6000m collection.

Watch lovers can expect the release of seven new state of the art models as a part of Omega's Ultra Deep collection. The watches are 6000 meters water resistant which is a staggering 20,000 feet under water, a feat that has not yet been achieved by any other watch maison in the world. The 45.5 mm range is led by a bold version crafted in sand blasted and forged grade 5 titanium.

Perhaps one of the most iconic features of the watch is the asymmetrical case which is reminiscent of the original Ultra Deep model. The watch features a brushed ceramic bezel with a trademark liquidmetal diving scale along with distinctive 'Manta Lugs' the case sits atop a cyan and black striped NATO strap that is made from polyamide yarn, sourced from 100% recycled fishing nets. A sturdy loop and buckle secures that watch to your wrist made in grade 5 titanium.

The dome shaped sapphire crystal houses a black titanium dial printed with cyan coloured numerals. The central seconds hand adds a touch of contrast to the dial with its blue gradient. On the inside of the watch, you will find a grade 5 titanium caseback featuring a laser engraved Sonar emblem and the signature Omega seahorse at its core. The words "Divers' watch 6000 m for saturation diving" are included to rearm the watch's adventurous credentials.

FREDERIQUE CONSTANT

Two's Company

Embracing the contours of time with a keen focus on the present, Swiss watchmaking maison Frederique Constant introduces two new sparkling additions to its flagship Highlife collection. Launched in 1999 the Highlife collection has been a landmark in the history of the brand as its superlative watchmaking techniques have stood the test of time.

Chic and glamorous the new Highlife Ladies Automatic features a 34 mm case adorned with yellow gold plating that acts as a perfect accessory to your wrist. The first model embodies the glimmer of gold with its fully yellow gold plated case, bracelet, indexes and hands. The only thing that can top a fully gold plated watch is diamonds; and the Highlife Ladies Automatic comes with eight genuine diamond hour markers. A date window positioned at 3 o' clock is outlined with gold making this timepiece a sight to behold.

The bezel, which has been polished using a mirror technique, showcases an alternating range of matte and polished surfaces that make for a captivating timepiece. Perhaps the most distinctive aspect of the Highlife collection, the dial is resplendent with the brilliance of diamonds decorating the edges and the iconic engraved globe giving this timepiece its signature look. The bracelet of the watch is gilded in gold where two satin finished links hug the polished central link

completing the timepiece. Along with this watch, the wearer will also receive a white rubber watch strap attached with a yellow gold plated pin buckle allowing the piece to go from red carpet to urban look in the blink of an eye and without tools!

For those who simply cannot choose between the glimmer of gold and the allure of silver, Frederique Constant offers a two toned timepiece as part of its Highlife Ladies Automatic repertoire. An aesthetic combination of tones, metals and reflections this piece is for those who prefer a bold and playful mix of tradition, modernity and urban landscapes. All the satin finished gold plated parts of the previous model have been swapped for the solid and grey hues of steel while the rest of the piece remains intact in gold. Like its yellow gold counterpart, this new model also comes with a rubber strap. Both models enclose an automatic calibre with a 38-hour power reserve, richly decorated in a spiral pattern and visible through the open case-back.

SONATA

Behind The Scenes

Sonata has been synonymous with statement making watches at an affordable price range as their timepieces incorporate the latest trendy designs with superior quality standards. The brand offers a watch for every wrist and occasion, continuing to evoke pride and confidence in every customer.

In its latest collection, Sonata takes you into the fascinating inner workings of a timepiece as it presents Unveil - Skeletal a quartz watches collection. The visible transparent moving parts of the skeletal quartz showcase the movement and present the wearer with an insight into the intricate world of watchmaking.

Style meets function in this newest launch that comprises of both men and women's watches. It offers

customers a wide variety of 17 variants to choose from along with a plethora of colours and strap options. You will find multi-crystal studded dials as well as dual finish metal straps, stunning steel cases and even polished leather straps in the Unveil-Skeletal collection. Be it a formal meeting or a casual catch up with friends, the collection has something for everyone. Each piece is priced between INR 1999 to INR 2499 making it a pocket friendly option for gifting as well.

FASTRACK

Smart Watches Just Got Smarter

Expanding its existing portfolio of wearable technology, Fastrack forays into the smart watches category with the introduction of its first smart watch, Fastrack Reflex Vox. The smartwatch features a rectangular 1.69" HD screen and has unique features like built-in Alexa, up to 10 days of battery life, 100+ watch faces and multi-sports mode.

Fastrack Reflex VOX includes music control, camera control, hydration alerts and notifications alert, thus providing a seamless functional experience to the users. The watch features a soft silicone band that never goes out of style and sits comfortably on the wrist to give a fashionable look. This smartwatch comes in four beautiful colours – Carbon Black, Blazing Blue, Champagne Pink and Flaming Red.

As a sister concern of Fastrack, Titan launches the latest variant under the smart watches umbrella called Titan Smart Pro. Created with an AMOLED Display (390*390 resolution), on-board GPS, 14 day battery life (under standard conditions), 14 sports modes and over a 100 watch faces. The brand has incorporated key health

features such as Body temperature monitoring, Heart rate monitor (HRM), Blood Oxygen saturation (SpO2), Sleep monitor with REM tracking and Stress monitor to help consumers lead a more wholesome life. Further, to enhance the accuracy of outdoor activities, it comes with inbuilt Altimeter, Barometer and Compass. In addition to these, the product also comes with notification alerts, Music control, Camera control and Weather alerts.

Titan Smart PRO is available in five color (case color) variants – Black, Blue, Pink, Green and Red. This smart watch connects to the Titan Smart Pro app, which provides a superior user experience, and is compatible with Android Version 6.0 and above; iOS version 9.0 and above.

WATCHES AND WONDERS GENEVA

From left to right, Emmanuel Perrin, Watches and Wonders Exhibiting Committee, Vice-President, Jerome Lambert, Richemont Group CEO, Fabienne Fischer State Councilor, Serge Dal Busco, Council of State, President, Jean-Frederic Dufour, Watches and Wonders Exhibiting Committee, President, during the first day of the Watches and Wonders GENEVA, in Geneva, Switzerland, Wednesday, March 30, 2022. The Master Event of the Watches and Wonders ecosystem brings together the leading names of the Watchmaking and luxury industry from March 30 to April 5, 2022 at Geneva Palexpo.

WATCHES AND WONDERS GENEVA

A Wonderful Response

After a two year long hiatus, 2022 marks the return of in person trade shows and the excitement is palpable. Watches and Wonders Geneva saw the presence of renowned watch making brands, watch makers and watch lovers as they experienced the latest launches, products, panel discussions, keynote speeches as well as creativity displayed at the watch industry's largest summit. The show has received an overwhelming response from the attendees which reinforces the importance of this annual get-together.

The event saw nearly 22,000 unique visitors, including nearly 1,000 journalists who traveled to Geneva for the event, generating more than 30,000 overnight stays, this year's salon has ended on an extremely positive note. Thanks to the 38 exhibiting Maisons, including 19 newcomers, the show was buzzing during a week of extraordinary dynamism.

For its first physical event under its new name, Watches and Wonders Geneva developed an exhibiting Salon where brands could showcase their timepieces and entertain clients as well. This produced strong results for the exhibiting Maisons, and occasionally exceeded all expectations, with some brands selling out of their new pieces before the event concluded.

In a world where social distancing became the norm, Watches and Wonders Geneva gave attendees the pleasure of trying out the pieces so that they can experience the skill and craftsmanship up close and personal. In total, there were 1,700 Touch & Feel sessions for the press, 20 Keynotes from exhibiting Maisons, 7,000 meetings with retailers, not to mention the many discussion panels addressing future challenges such as sustainability, innovation and customer experience.

With an estimated reach of 350 million people and 800,000 posts mentioning #watchesandwonders on various social media platforms and other digital channels, Watches and Wonders Geneva is ensuring that watchmaking achieves international impact. The official website attracted nearly 155,000 unique

users, enabling the 2,600 accredited digital journalists to follow all the news from the salon live. Nearly 80 product presentations were broadcast digitally to meet the needs of those press members who could not make the trip. The 35,000 views of the first Morning Show, presented by renowned business journalist Olivia Chang, testify to the expectations of a discerning audience. These same viewers also enthusiastically welcomed the Late Show, the new program, which was also broadcast live from the salon every day on the website and on its Youtube channel.

As always, the Watches and Wonders show has thrown up a number of trends in the world of watches which set the tone for the coming year. The many different GMT watches were competing with chronographs, often part of a sporty chic look. One notable trend is for models fitted with a minute repeater, a skeleton movement or a tourbillon which

should delight collectors, just like the dials demonstrating the skills of artistic trades such as marquetry or enamel.

Platinum and yellow gold continue to rule the roost while titanium is becoming more widespread. The colors of choice remain blue and green and black in either a glossy or matt finish are still popular choices. Orange, coral and red are limited to a few designs, as are mineral, beige and forest green shades.

Focused on creativity, innovation and sharing, the 2022 Watches and Wonders Geneva event ended on a very positive note. With its hybrid, physical and digital, format, the salon has made it possible to reconcile the demands of an ultra - connected age with in-person meetings, proving that both are possible. Watches and Wonders Geneva has just demonstrated that watchmaking know-how, artistic craftsmanship and NFT (Non-Fungible Tokens) can coexist harmoniously.

Karishma Karer with Rolf Studer, CEO of Oris

Karishma Karer with Wilhelm Schmid, CEO of A. Lange & Söhne

A. LANGE & SÖHNE

An Audio Visual Masterpiece

A beautiful amalgamation of light and sound, the latest launch from the German house of A. Lange & Söhne is a treat to both, the eyes and ears. The complex design of the Richard Lange Minute Repeater is based on the

traditional sound format: when the slide integrated into the left-hand case flank is actuated, the chiming mechanism strikes the hours, the quarter hours, and the minutes. It follows a mechanical programme that with two differently tuned gongs can strike 720 different sequences – one for every minute in the twelve-hour cycle. The hours sound at a lower pitch, the quarter hours with a double tone, and the minutes that have elapsed since the last quarter hour with a higher-pitched tone.

The time, for example, 1.51 a.m. or 1.51 p.m. – would thus be struck with a low tone, three double tones, and six high tones. When the repeater sequence is activated, the sapphire-crystal caseback reveals exactly how the mirror-polished gong hammers execute the respective sequence of strikes on the two gongs that are wrapped around the movement. A refined system of artistically choreographed racks, snails, levers, and wheels controls the 191-part mechanism.

The watch is designed to superb acoustic quality standards. The tuning effort involved corresponds to that of an exquisite musical instrument. A lucid, clear, and reverberant sound is assured by the hand-tuned gongs that harmonise perfectly with the acoustic characteristics of platinum, the case material.

The platinum case has a diameter of 39 millimetres and a height of only 9.7 millimetres. It features the typical satin-finished flanks and prominently domed strap lugs. The white enamel dial has a solid-gold core and is crafted in-house. The new, manually wound movement L122.1 beats within the interiors of the watch. Six bearing jewels are set in polished gold chatons on a three-quarter plate made of untreated German silver and decorated with Glashütte ribbing. Four of the chatons are secured with thermally blued screws. The winding train, decorated with solarisation, is visibly integrated into the plate. This one of a kind timepiece is limited to only 50 pieces and is a prized possession for every watch lover!

Watches by CARTIER

Time and Again

The house of Cartier is synonymous with fine craftsmanship, cutting edge design and precise watch making. Going back almost one hundred years, Cartier has a long history

with the art of watchmaking, particularly mystery clocks. The first Cartier mystery clock appeared in the year 1912, and it was called the Model A. The Model A mystery clock was a fine creation that combined an ample doze of mechanical intricacy and classical French aesthetics.

Produced just two years before the start of the First World War, the Model A had a transparent glass dial in which the hour and minute hands were suspended, appearing completely disconnected from the movement. The Model A, constructed by clockmaker Maurice Couët for Cartier, was the first of many variations on the Magic Clock or Mystery Clock theme, and the secret to how they worked was closely held – even Cartier boutique staff weren't in on it.

This year, Cartier is introducing the latest variation on the theme of a mystery watch: The Cartier Fine Watchmaking Masse Mystérieuse at the Watches and Wonders 2022 Geneva. “Mysterious Mass” could literally mean anything from a religious rite to a medical diagnosis. In this case, however, it translates into an automatic, time-only watch with the most unusual winding system you will ever see.

The automatic winding mass also consists of the entire movement and all its components, including the mainspring and escapement. The case is made of platinum and is 43.5 mm in width and 12.64 mm in thickness. The movement used here is the Cartier calibre 9801 MC which gives a 43-hour long power reserve. The movement has been open-worked so you can see all the active parts of the calibre. The 39.6 mm x 7.3 mm movement operates in 43 jewels at a frequency of 28,800 vph.

THESE WATERS VA GRAND SEIKO

From Concept To Reality

In 2020, Grand Seiko introduced a patented mechanism “Constant-force Tourbillon” which consisted of 340 components working in complete synchronization. While it was an

impressive feat, the brand continued to conceptualize and develop a technology that the world of watches has never seen before. So in 2022, the Japanese watch making brand has introduced an unprecedented, innovative movement that delivers a level of stable accuracy unprecedented for Grand Seiko by combining a tourbillon and a constant-force mechanism as one unit on a single axis for the very first time in horological history.

The resulting watch is named Kodo, the Japanese word for heartbeat. With its unique appearance when in motion and with its carefully designed sound, this revolutionary watch reveals its vitality both audibly and visually, thanks to the open-work design and the sapphire case back.

The watch is equipped with Caliber 9ST1, which has been re-designed from its predecessor after examining the 340 components that it consists of. The integration of the two mechanisms creates a dazzling visual effect. The inner tourbillon carriage rotates smoothly as the balance steadily vibrates at 8-beats per second and the outer constant-force carriage follows its rotation at exact one-second intervals.

The sounds of the escapement and of the once-per-second impulse of the constant-force mechanism harmonize with this regular visual rhythm to create, for both the eye and the ear, a deeply satisfying and re-assuring heartbeat. There is a powerful yet gentle charm to the sound that is set to a 16th note or semi-quaver which is made possible by 9ST1 being the movement with the highest frequency.

Thanks to the integration of the two key mechanisms, Caliber 9ST1 has room to breathe within the case and there is sufficient space for light to penetrate, through both the front and back of the case, revealing the beauty of the hand finishing. The strap is made from calf leather and sits comfortably on the wrist.

The Grand Seiko Kodo is a limited edition timepiece of just 20 watches that will be available in October 2022.

HUBLOT

Colourful Trip Around The Globe

For more than 15 years, watch making maison Hublot has presented a slew of options in its signature ceramic timepiece, The Big Bang with an integrated bracelet. The Big Bang provides a strong aesthetic for a timepiece

with clearly defined lines, fully integrated in ceramic, with the exception of the composite lugs, pushers and crown over moulded with rubber.

Thanks to its innovation, Hublot has pushed the boundaries of ceramic, by increasing the hardness and scratch resistance of this material and enhancing the intensity of its colour while retaining its lightness, making it a delight to wear owing to its low thermal conductivity and its hypoallergenic quality.

With this Hublot ceramic, the Big Bang Integral is in its element, bringing 4 new monochrome shades to the collection. Each available in a limited edition of 250 pieces, there are 4 colourways which represent the elements of water, earth and wood each taking you on a journey around the world.

An indigo blue from the Majorelle Garden and the streets of Chefchaouen in Morocco, and the Blue City of Jodhpur in Rajasthan. A sky blue from the South Seas. A sand beige from the deserts, and from the beaches of the Caribbean. And a jungle green from the tropical forests.

All packed in a 42-mm case, ready to take you on a non-stop 72-hour journey tracked by the UNICO V2 manufacture movement. The piece is equipped with the HUB1280 calibre featuring a slimmer design, new architecture, easier assembly and enhanced legibility and functionality. It also boasts an integrated bracelet featuring 3 bevelled and chamfered links with polished and satin-finished surfaces. It is made out of 22 components each requiring a separate tool. The unique design of the Big Bang Integral Ceramic is set off to stunning effect by these colours and finishes.

Rendez-Vous Dazzling Star. The

ATCHES
ONDERS
NEVA
JAEGER-LECOULTRE

Star Struck

The intrigue and romance shooting star plays inspiration Swiss Watch making maison Jaeger-LeCoultre's latest offering enchanting celestial phenomenon has been replicated in a timepiece, thanks

to an entirely new mechanism conceived and developed within the Manufacture. Activated by the movement of the wrist, the shooting star appears on the dial at random moments – usually four to six times per hour – its unpredictability making it even more special. To enjoy the enchanting display more often, the star may also be summoned on demand by turning the winding crown several times.

Entirely made of blue Aventurine, the dial of the new Rendez-Vous Dazzling Star exquisitely captures the beauty of a star-studded night sky. In the centre, framed by a ring of diamonds, three discs are layered over each other. As per the design codes of the beloved Rendez-Vous collection, the central display is surrounded by a ring of applied numerals in the signature Floral font and applied hemispherical hour markers. The time is indicated on these scales by golden Floral hands.

Surrounding the 36mm pink gold case, the bezel forms two concentric rings. There's an airy quality to these glittering circles, thanks to the prong setting of the outer ring of 36 stones. To complete the watch case, the upper surfaces of the lugs are set with diamonds and an inverted diamond is set into the crown.

The rich blue of the dial is complemented by a shiny blue alligator strap with a folding buckle, or by a sumptuous, fully-set pink gold bracelet specially designed for the Rendez-Vous Dazzling Star. The watch has been equipped with in-house automatic calibre 734, including the shooting star mechanism making it a first of its kind timepiece in the history of watch making. The bracelet's lozenge-shaped links are grain-set with a total of 436 diamonds (for 4.88 carats) that complete this dazzling timepiece.

HES NDERS VA ORIS Breaking Bar

A timepiece is so much more than an instrument that tells you the time. It is a labour of love that requires million of tiny parts to

work in perfect harmony that gives you the precise time. It is perhaps this reason that the process of manufacturing a timepiece is referred to an art. And it truly is one. With the increase in use of technology, this art has fallen by the wayside as most people forget the joys of a mechanical watch. But to ardent watch lovers they continue to hold immense value. Mechanical watches are an antidote to technology's blinding light. When you see an escapement wheel oscillating or a chronograph's pushers initiating the steady advance of a central seconds hand, it's reassuringly knowable. Poetic. Joyful even.

Oris' newest launch the new ProPilot X Calibre 400 is designed to inspire joy no matter what angle you come at it from. The dial is a 39mm case forged in titanium and the taut, angular lines of the aviation-inspired form are satin and sand-blasted, giving the watch its raw, technical look, and complemented by the familiar ProPilot bezel and a muscular, sculpted titanium bracelet. The oversized crown is also forged in titanium, and flanked by protectors.

The launch collection offers a choice of three dial colours: grey, blue and salmon. This is a fresh, expressive palette, chosen to augment the case's dynamic proportions – and to bring life and colour to your wrist. The flipside of the watch showcases the pulsating watchmaking artistry of the watch. The watch's titanium case back and open sapphire crystal frame Oris Calibre 400, Oris' in-house five-day automatic.

As with all Calibre 400 Series movements, it's accurate to -3 to +5 seconds a day. This base calibre version has a sweep central seconds hand and a date at 6 o'clock. All Calibre 400 Series watches carry 10-year warranties and 10-year recommended service intervals, and that applies to the ProPilot X Calibre 400, too. With such impressive specifications, it's no wonder that Oris' mechanicals watches are a coveted item in your watch wardrobe.

PANERAI

Towards A Sustainable Future

As a leading watchmaker, Panerai has conquered the art of watchmaking through its sophisticated movements and exceptional finishing. But as the

world moves towards the search of a sustainable and greener future, Panerai is committed to offer its clients a timepiece that will reduce the ecological impact of every aspect of the watch industry.

The newly launched Submersible QuarantaQuattro eSteel recognizes the critical importance of sustainability goals while maintaining the brand's established design codes and technical finesse: 72g of the Submersible QuarantaQuattro eSteel is made of recycled materials, corresponding to 52% of the total weight of the watch which is 137 g.

A mix of deep blue, gray and green shades make up the dial and bezel of the 44mm Submersible Quaranta Quattro eSteel. The timepiece uses polished ceramic material, but the high gloss surface on the unidirectional bezel is the first of its kind in Panerai history. The gleaming mechanism frames another standout element: the dial which has a polished finish and color gradient that steadily deepens from top to bottom, giving its appearance a surprising dimension.

The P.900 is an automatic caliber that is only 4.2mm thick and supports a date indication and three-day power reserve. The watch is water-resistant to 30 bar (approximately 300 meters). Two straps are included with each watch, both in the same color as their companion dial.

The focus of Panerai on sustainability is not confined to eSteel; the first strap is composed of fabric made recycled PET, while the second strap is made from recycled rubber. A tool that allows interchangeability of the straps and a screwdriver for removing the buckle also accompanies every watch.

THE UNDERS VA ROLEX

Exploring the Unknown

The legendary Rolex GMT-Master has always been a favourite amongst travelers and adventurers. With its signature design that sports a bidirectional rotatable bezel and a 24-hour

graduated insert, this watch makes a dependable companion for globe trotters who like to take the path less travelled.

Unveiling its latest model, Rolex has designed an upgraded model of its much loved Oyster Perpetual GMT-Master II. On this watch, the crown and crown guard are on the left side of the watch case. This required changing the precision testing process for some of the final controls carried out as part of the Superlative Chronometer certification. The date aperture and the Cyclops lens have also moved and appear at 9 o'clock.

Made from Oystersteel and fitted with an Oyster bracelet, this watch features a two-colour monobloc Cerachrom bezel insert in green and black ceramic – a colour pairing never before seen on the model. With traditional hour, minute and seconds hands, a triangle-tipped 24-hour hand, and a bidirectional rotatable bezel with a 24-hour graduated Cerachrom insert, the GMT-Master II can display the time in two time zones simultaneously: either the local time and the reference time, or the local time and that of an alternative time zone. The date is synchronized with the local time.

As a symbol of robustness, the 40 mm Oyster case of the new GMT-Master II is guaranteed waterproof to a depth of 100 metres (330 feet). The timepiece is equipped with calibre 3285, which incorporates the patented Chronergy escapement, which combines high energy efficiency with great dependability. With such impressive features and a classic design, the new Rolex GMT-Master II is touted to explore uncharted territories along with its wearer.

THE SUN RIDERS VA TAG HEUER

Here Comes The Sun

Energized by the powerful rays of the sun, TAG Heuer's latest offering is an addition to the brand's already existing Aquaracer

Collection. Bold, active, and at one with nature – the philosophy behind the Aquaracer has always been one of courageously embracing the elements, all while looking effortlessly stylish. Now TAG Heuer is extending that philosophy to a new watch, with the release of the new TAG Heuer Aquaracer Professional 200 – featuring the new TAG Heuer solar-powered movement,

The sun will not only power the movement of the TAG Heuer Aquaracer Professional 200 Solargraph, it also lightens the Super-LumiNova elements of the watch. The bezel, dial and hands all feature Super-LumiNova allowing legibility at nightfall. In addition to giving the Aquaracer Professional 200 Solargraph an extraordinary and brightened look, the technology allows play sports even during the night with this highly legible watch on the wrist.

To better reflect the luminous contrast produced, this timepiece features a steel case with black DLC coating and bezel inserts made of a blend of carbon and green Super- LumiNova. This gives each piece a truly unique effect that is unlike any other, much like the ridges that naturally form on rocks over time. The particular dial of the timepiece is partially transparent, allowing the movement to be charged by sunrays, and the specific blue green color gives off an intense and unique shade reminiscent of the incredible colors of the aurora borealis that light up the nights above the Arctic Circles.

A black rubber strap gives the watch a sporty look by keeping in line with the athletic positioning of the Aquaracer Professional collection. To develop this reliable and very efficient movement Calibre TH50-00, TAG Heuer has teamed up with the Manufacture of La Joux-Perret based in La Chaux-de-Fonds, using the renowned and proven "Eco-Drive" solar dial technology for the first time in Switzerland. Caliber TH50-00 is developed and produced exclusively for TAG Heuer. The timepiece also offers an extended international warranty up to five years.

THE TUDOR VA

Adventure Awaits

If you are someone who loves to explore the unknown, always down for an adventure and shy away from the conventional then the Tudor Black Bay Pro is the

right pick for you. A tool watch designed for professional use, the timepiece is a part of the brand's Black Bay line and a valuable addition into the Swiss watchmakers repertoire of timepieces.

The latest offering introduces many new and unique aesthetic details, starting with its winding crown which has been entirely redesigned for maximum grip. Reminiscent of the curves found on the crowns of the brand's historical technical watches, this new component is set flush to the middle case band so that its tube is not visible. In another new feature, the applied hour markers on the dial are made from monobloc luminous ceramic. This feature enhances the technical aesthetic of Black Bay Pro whilst considerably increasing the luminous surface of the hour markers.

On the Black Bay Pro model, the reference time is indicated by an angular yellow "Snowflake" hand, an aesthetic hallmark of Tudor, which completes a lap of the dial every 24 hours. Local time is indicated by another, shorter "Snowflake" hand set by a jumping hour, which can be moved either backwards or forwards.

The watch is equipped with the Manufacture Calibre MT5652 with built-in GMT function exclusively developed by the brand. Together with its non-magnetic silicon balance spring, the Manufacture Calibre MT5652 is certified as a chronometer by the Official Swiss Chronometer Testing Institute (COSC), with its performance going beyond the standards set by this independent institute.

The strap for this particular watch comes in 3 variants. The wearer can choose from either a black woven strap with a yellow stripe, a stainless steel bracelet with a folding clasp or a hybrid strap in black rubber and fabric.

THE LEADERS VACHERON CONSTANTIN

All that Glitters

In 1977 Swiss Watch making maison Vacheron Constantin released an emblematic sporty chic timepiece called 222 'Jumbo' on the occasion of the maison's 222nd anniversary. The piece was made entirely out of 18k 3N yellow gold and measured 37mm in diameter. This marked a turning point in the brand's history as its monobloc flat-based tonneau-shaped case topped by a fluted bezel was it first of its kind. This timepiece with integrated bracelet displayed a robust, functional and sporty spirit with elegance stemming from the purity of its lines and the finesse of its curves.

Today, the brand re-launches its signature model, but with a few tweaks in the interest of comfort and enhanced reliability. Aesthetically, the watch resembles the original model where a 18k 3N yellow gold toned case measuring 37 mm in diameter is the face of the watch. The dial with straight hour markers and baton type hands which feature the Super-LumiNova coating of the hands and hour-markers (off-white by day and lime green by night) also results in improved readability. The bracelet is fitted with a triple-blade (rather than double-blade) clasp and the articulation of the bracelet has been redesigned to ensure a more comfortable feel on the wrist.

The case is adorned with a Maltese cross emblem at 5 o'clock has an exhibition back serving to reveal the new-generation in-house Calibre 2455/2 featuring an oscillating weight redesigned for this model. Operating at a rate of 28,800 vibrations per hour, it offers optimal precision with a level of finishing just as meticulous as that of the original model. Steeped in history, the 222 'Jumbo' is not just a timepiece but an heirloom that has stood the test of time.

THE INDERS VA

ZENITH

Modern Meets Classic

Fondly known as 'Master of Chronographs', Swiss Luxury watchmaker Zenith boasts of an illustrious history and countless

achievements in the watchmaking industry under its belt. As a brand that has 50 years of experience in creating mechanical chronographs, the title of 'Master of Chronographs' is well deserved.

In 2003, Zenith introduced the Chronomaster Open with the aim of making the high frequency beating heart of its El Primero calibre as prominently visible as possible. It marked the first time in the history of watchmaking that a chronograph featured a partially open dial solely to reveal the regulating organ and escapement.

Revisiting the iconic tri-colour dial configuration that debuted in 1969 and which remains a distinctive and instantly recognizable El Primero design element, the latest iteration of the Chronomaster Open retains it entirely with a transparent twist. Instead of cutting out the small seconds counter at 9 o'clock entirely as was the case with the previous versions of the Chronomaster Open, the three counter colours are retained thanks to a hesalite crystal element that serves as a readable sub-dial while allowing a view of the silicon star-shaped escape wheel.

The opening itself has also been reinterpreted, foregoing the former version's applied "frame" and instead opting for circular openings with chamfered edges, revealing the movement with more straight bridges and a more contemporary grey tone. Catering to the prevalent demand for watches with more modest proportions, the round case now measures 39.5mm wide compared to the previous 42mm model, with slimmer lugs and more pronounced polished bevels on the edges.

The pump-style pushers now feature rounded tips for a more comfortable touch. The steel bracelet option follows the contours and mixed polished and satin-brushed finishes of the case. Visible through the sapphire display back, the El Primero 3604 1/10 th of a second automatic chronograph movement is a modified version of the 3600 that debuted in the Chronomaster Sport, featuring an open base plate and bridges that allow for a clearer view of the high-frequency 5Hz escapement with lubricant-free silicon escape wheel and pallet lever.

MAURICE LACROIX

Riot of Colours

Ever thought it was possible to upcycle a plastic bottle into a wrist watch? Well, with Swiss watch brand Maurice Lacroix, this is now possible. Unveiling the brightest, most eye catching collection of watches in every colour of the rainbow, Maurice Lacroix will help you conserve the environment whilst looking on trend!

In 2016, Maurice Lacroix launched AIKON, a model known for its precise timekeeping, impressive readability and extraordinary levels of wearer comfort. This year, the brand launches AIKON #tide in an attempt to reduce plastic waste that ends up into the ocean. The watch is made of #tide which is an ocean bound, upcycled plastic combined with glass fibre. The resultant composite material is twice as hard as standard plastic, five times more resistant and has a carbon footprint significant less than the production of virgin PET. Every component of the watch including the bezel, case, crown, end piece and buckle are made from this composite and it takes 17 plastic bottles to create one #tide AIKON watch along with its customized packaging.

To elaborate on the watch specifications, the case measures 40 mm in diameter and features a flat sapphire crystal, augmenting readability. The dial has the Vague du Jura motif engraved on its surface which acts as a stylish shout out to the ocean. The AIKON #tide is endowed with a screwed crown together with a screwed caseback that allows the watch to be water resistant up to 100 meters underwater. The model has been fitted with the Easy Strap Exchange system, allowing the wearer to swap the strap for an alternative without the need for tools.

The AIKON #tide is fitted with a quartz movement thus guaranteeing convenience and precision. Backed with a 5 year warranty, the AIKON #tide is a complete Swiss branded watch that is sure to add a riot of colours to your watch wardrobe!

SEIKO

Break The Ice

In the 1960's and 1970's when adventurers set off on polar expeditions, the watch that was their constant companion was none other than Japanese watch making brand Seiko. Known for its ability to last under extreme conditions along with its superlative watch making designs, Seiko was the preferred choice when it came to explorers, adventurers and travelers. Thanks to its proven endurance and unbeatable performance on the ice, Seiko takes watch lovers back to its polar roots with the launch of its latest Prospex Collection. Incorporating the same spirit of adventure and zest for life, the collection is sure to become a beloved addition to your watch wardrobe.

Pristine shades of white and blue reminiscent of the glaciers located in Arctic Circle and Antarctica have been immortalized in these watches that lend a unique aesthetic to your collection. Each watch in the collection has been inspired by one of Seiko's early models launched between 1960's and 1970's.

MOVEMENTS
YOUNG TOWN

The collection is a modern re-interpretations of three legendary diver's watches from this period that draw their design inspiration from the glaciers that these pioneers saw and that shape the landscapes and seascapes of the Arctic and Antarctic. Each one has a dial that evokes a different shade of glacial ice, from deep blue to white.

First up is the deep blue dial watch from 1965 used by the members of the Japanese Antarctic Research Expedition. Another light blue dial graced with a darker blue bezel had been recreated from the landmark 1968 diver's watch. It was the first Seiko watch with

300m water resistance and a 10-beat automatic movement. The timepiece worn by Naomi Uemura in 1970 when he completed a 12,500 km solo dog-sled run from Greenland to Alaska serves as inspiration for the third and final piece in the collection.

All three watches are powered by the Caliber 6R35 which delivers a power reserve of 70 hours. Each timepiece is 200 meter water resistant perfect for an adventurous expedition into the Arctic. The twelve indexes along with the watch hands have been coated with Lumibrite so as to maximize legibility in the dark.

MICHAEL KORS

Wedding Bells

Weddings are the perfect time for you to shine. Be it as a bride, family or a guest, everyone is expected to look their best.

What better way to accessorize than a timeless timepiece that will be the perfect addition to your watch wardrobe. Luxury brand Michael Kors has launched its bridal collection with different categories for each wedding attendee.

Since all eyes are on the bride, her look has to be simply perfect. The collection's MK Lennox Quartz Watch is your best companion as you begin this new phase of life. The Michael Kors logo takes centre stage in a bold faceted form with a full pavé sparkling dial. This gold-tone watch features a uniquely faceted pavé top ring and golden stainless steel band and is sure to be an eye-catcher.

The MK Everest Watch in Rose Gold with Blush coloured Stones is the most spectacular companion for a blushing bride. Bejewelled with light and dark semi-precious rose-coloured stones, the 42mm case is further etched with sparkling gems on its rose-gold-tone stainless steel bracelet.

It is said that a daughter's wedding day is the most special day in a mother's life. Smiling, but teary eyed, the mother goes through a gamut of emotions but still manages to look elegant during the ceremony. A lady such as this deserves to be dressed to the nines in Michael Kors MK Everest Watch in Gold with Sparkling Stones. This classic chronograph gracefully consists of a 36mm case in a gilded gold metal. Adorned with semi-precious stones around the dial reflect the sparkle and shimmer of the happy mother of the bride.

Next in line, the bride's sister can dress up to her heart's desire as it the happiest day of her sister's life. The MK Everest Watch in Gold with Turquoise Stones is a chic timepiece that features a light and dark turquoise baguette stone topring on an oversized 42mm case. With a gold-tone chronograph dial and stainless steel bracelet this is a great accessory to commemorate this special occasion.

What's a wedding without the fun and glamorous presence of bridesmaids? The MK Everest Watches in Rose Gold and Silver with Sparkling Stones is equipped with a quartz timepiece and the beautiful white dial is covered with high-quality mineral glass with a stainless steel strap. The chronograph has a 36mm case with a folding closure clasp with WiFi smartphone connectivity which makes for instant Instagram uploads!
